Forgotten Books, United States, 2015. Paperback. Book Condition: New. 229 x 152 mm. Language: English Brand New Book ***** Print on Demand *****.Excerpt from *Essentials of Medical and Clinical Chemistry: With Laboratory Exercises* In this Fourth Edition the text has been largely re-written, especially the clinical portion, and much new matter added. Realizing the need of a brief text-book that would also serve as a practical laboratory guide, the author has, wherever the directions in the text are not sufficiently explicit, added, as foot-notes, a series of simple laboratory exercises embodying such experiments as he has had his students perform during his twenty years of medical laboratory teaching. It will be noticed that the experiments are so simple as to require only such apparatus as the general practitioner has, or should have, about his office. In keeping with the present pharmacopoeia, the old spelling is retained. Thanks for valuable assistance is extended to the author's colleagues, Drs. Solomon, Rominger and Rapp, Professors of Materia Medica, Inorganic Chemistry, and Organic and Clinical Chemistry, respectively, in the Medical Department of Kentucky University; to Dr. Harris M. Kelly, Professor of Chemistry in the Louisville Medical College, and to Dr. Jas. Lewis Howe, Professor of Chemistry in Washington and Lee University. This edition is presented with the hope that it may meet as cordial a reception as its predecessors, and that teacher and student will find the author's labor has lightened theirs. About the Publisher Forgotten Books publishes hundreds of thousands of rare and classic books. Find more at [This book is a reproduction of an important historical work.
