The Sense of Touch in Mammals and Birds: With Special Reference to the Papillary Ridges (Classic Reprint) (Paperback)

By Walter Kidd

Forgotten Books, United States, 2015. Paperback. Book Condition: New. 229 x 152 mm. Language: English . Brand New Book ***** Print on Demand *****.Excerpt from The Sense of Touch in Mammals and Birds: With Special Reference to the Papillary Ridges The following contribution to the study of the sense of touch in Mammals and Birds is based upon certain papers and exhibitions of specimens communicated to the Zoological Society of London, the Anatomical Society of Great Britain and Ireland, and the Journal of Anatomy and Physiology. The chief of these was read before the Zoological Society, but was not published in the Transactions. Two very extensive and important papers, one by Miss Inez L. Whipple, and another by Prof. O. Schlaginhaufen, had been published a very short time before my paper was read, and as these covered much the same ground, and as, not knowing of their existence, I had not discussed them, its publication became impossible without very great alterations and additions. It seemed better, therefore, to incorporate it with certain other microscopical studies of the skin-structures of the hand and foot in mammals, and make it a small introduction or anatomical basis for the consideration of the sense...

Reviews

I actually started looking over this publication. It really is rally interesting throgh studying period. Once you begin to read the book, it is extremely difficult to leave it before concluding.
