

## Minutes of Proceedings of the Institution of Civil Engineers Volume N . 132

Filesize: 4.76 MB

### ***Reviews***

*A whole new eBook with an all new standpoint. It is actually rally fascinating throgh reading through time period. You wont truly feel monotony at anytime of your own time (that's what catalogues are for relating to when you request me).*

*(Claire Bartell)*

## MINUTES OF PROCEEDINGS OF THE INSTITUTION OF CIVIL ENGINEERS VOLUME N . 132

RareBooksClub. Paperback. Book Condition: New. This item is printed on demand. Paperback. 196 pages. Dimensions: 9.7in. x 7.4in. x 0.4in. This historic book may have numerous typos and missing text. Purchasers can download a free scanned copy of the original book (without typos) from the publisher. Not indexed. Not illustrated. 1898 Excerpt: . . . and the system pursued in those Mr. Dunn, days (for all were constructed many years ago) of very copious watering to each layer, were the chief causes of failure, though in the case of the Waghad dam a great mistake was made in ever attempting an earthen dam at the site, which was eminently suitable for a masonry dam with earthen flanks. The dams which had stood well were: (1) those of moderate height on good foundation, and (2) those which, for want of black soil, had of necessity to be constructed of lighter soils, less retentive of moisture, as brown, red, or whitish soils. None of the ten dams were drained in construction, and those made of black soil and founded on the same, or on karal, and without any natural drainage in the subsoil, became, with their foundations, like overwet dough and sank with their own weight, bulging out at the toe on the down-stream side, but kept from doing so on the up-stream side by the superincumbent weight of water. The necessity of providing for the efficient drainage of such works was established beyond question, but he observed that the Author still advocated the use of black soil, modified, however, by admixture with half its bulk of murum, or other dry material. He much preferred to reject this rich and exceedingly retentive soil altogether, save only where its use was absolutely necessitated by the absence of other soil within reasonable distance, for experience...
