Excerpt: . chapter iv output we have given in the preceding chapter such particulars relating to the working of a colliery as are in our opinion absolutely necessary to be known before it is possible to understand the present position as regards output. These particulars have been made as simple and few as possible, because it is not the purpose of this book to explain how coal is got. It is rather one of its purposes to show why so little coal is being got to-day and how by some means or other that low productivity must cease if the nation's industries are ever to regain their pre-war prosperity. We shall consider the matter from three points of view: (1) loss of output due to loss of time; (2) loss of output due to lack of intensity of effort in the time actually worked;...
